Mentation After Medication: An Update

In an era of rapidly developing pharmacological treatment approaches, it is important to develop a clear understanding of the relationship between medications and cognitive functioning. Pharmacological approaches to improving cognition are increasingly being used in a wide variety of patient populations, from Alzheimer's disease, traumatic brain injury, and schizophrenia to more mildly impaired individuals such as those with greater than expected age-related cognitive decline that do not meet criteria for dementia (i.e., Mild Cognitive Impairment). Clinicians diagnosing and treating cognitive impairment need to develop improved awareness of the risks and benefits of pharmacological treatments on both cognition and behavior.

Program Schedule

9:00 Registration

9:30 Organizers' Opening Remarks

9:50 **The Impact of Attention Deficit Hyperactivity Disorder Therapies Upon Cognitive Functioning**

Donna Palumbo, PhD

Associate Director, Neuroscience Research, Pfizer, Inc.
Adjunct Associate Professor of Neurology, Pediatrics, and Psychiatry
University of Rochester School of Medicine

10:35 Audience Participation

10:45 Morning Break

11:00 **Cognitive Dysfunction Related to Cancer Treatment**

Denise D Correa, PhD

Assistant Professor of Neuropsychology in Neurology
Weill Cornell Medical College

11:45 Audience Participation

12:00 Lunch Break

1:30 **Medications in Alzheimer's Disease: Indicated, Contraindicated, and Investigational**

Lawrence Honig, MD, PhD

Associate Professor of Clinical Neurology
Columbia University College of Physicians and Surgeons

2:15 Audience Participation

2:25 **Cognitive and Behavioral Effects of Antiepileptic Drugs**

David Loring, PhD

Professor, Department of Neurology
Emory University

3:10 Audience Participation

3:20 **Speakers' Roundtable Discussion**

3:45 **Conference Ends**

NYNG Board of Directors

Paul Mattis, PhD, President

Lisa D Ravdin, PhD, Vice President

Heidi Bender, PhD, Secretary

Diamanto Tsakanikas, PhD, Treasurer

Ann DeSollar, Webmaster

Elise Caccappolo, PhD
